

EX Pell & EX Pell *Secure*

MICROCENTRIFUGE TUBES

CAPP **EX Pell** and **EX PellSecure MCT** are manufactured from virgin PP, out of the finest molds available.

All CAPP **EX Pell** and **EX PellSecure MCT** are **DNase, RNase** and **Pyrogen-free** and withstand up to 20.000g.

EX Pell Secure Low-Retention Microcentrifuge Tubes offer a superior smooth inner surface, minimizing sample binding.

EX PellSecure Black Microcentrifuge Tubes are suitable for applications requiring photo-sensitive, fluorescent or ethidium bromide probes. Unlike amber tinted tubes, they are completely opaque and protect even the most light-sensitive samples.
